

8 converting said application code based on said single code conversion rule into a plurality  
9 of other codes.

1 24. (New) The method of Claim 23, wherein the step of converting said application code  
2 further includes converting said application code into a plurality of other codes specified  
3 by a user for said single code conversion rule.

1 25. (New) A computer-readable medium carrying one or more sequences of instructions for  
2 converting code values between applications, wherein execution of the one or more  
3 sequences of instructions by one or more processors causes the one or more processors to  
perform the steps of:

5 storing first data that associates a plurality of code conversion rules with a field defined  
6 by an application;

7 receiving an application code associated with said field;

8 selecting, based on said first data, a single code conversion rule from said plurality of  
9 code conversion rules; and

10 converting said application code based on said single code conversion rule into a plurality  
11 of other codes.

1 26. (New) The computer-readable medium of Claim 25, wherein the step of converting said  
2 application code further includes converting said application code into a plurality of other  
3 codes specified by a user for said single code conversion rule.
